

More Than Great Gasketing, More Than Legendary Quality.

There's never been more to ZERO. If you still think we're only about weatherstripping, it's time to take another look. We're a full-line company providing a single source for integrated, specialized door sealing systems—not to mention hinges, saddles and thresholds! Specifiers and architects come to us with confidence for answers to a broad spectrum of needs. Here are just a few:

❑ Life safety leadership—We developed our **INTUMET™** intumescent material and gasketing specifically for door and hardware applications. And we continue to take the lead in testing to solve positive-pressure compliance challenges.

❑ Versatility—We have expanded our product line to offer specialty rubber extrusions manufactured by our subsidiary, **IND-EX, Inc.**

❑ Acoustical wizardry—Our **SOUND TRAP™** sound control systems provide the highest available STC (sound transmission class) ratings. Ask for our 20 page Sound Solutions brochure.

❑ More than just seals—Our **TRACTION TREAD™** saddle and nosing systems are designed for superior traction and even wear. And both standard-duty and high-performance **HINGES** from ZERO provide extraordinary value.

www.zerointernational.com

❑ Dynamic website support—The **ZERO** online catalog with our complete library of CAD drawings, earns consistently great reviews for utility and user-friendly design.

And nobody does it better. We know how to make things work right. And we know how to make things last. To those who know us, the ZERO name means quality. Maybe it's time for you to get to know us better. Call 1-800-635-5335 or visit our website.

When Nothing Else is Good Enough for Long Enough
